

DIGITAL Specials display

Promote your specials....digitally, dynamically!

build your brand integrity

Visioncast Media Group introduces Digital Special/Menu Displays.

Our dynamic Digital Daily Special Boards are designed to take the place of the traditional restaurant chalkboards. The true beauty of the board is the versatility. With a few clicks you can change prices add specials or post photos on the fly without having to recreate the entire chalkboard. Instead, using Media Manager, a simple web-based interface your restaurant can make these changes and instantly post.

A Visioncast representative will work with you to create customized background screens with a unique look and feel exclusively for your pub or restaurant. Then using Media Manager, simply add your text and photos. The dynamic rotating screens and animated graphics are automatic, making your dynamic creation simple and fast.

Many locations are eligible for an ad-supported version. Call us today at 778.245.6363 or email us for more details..
